Summer Performance & Rate Review

Prepared 2026-07-24 · As-of pace date 2026-07-24

Property-first analysis. 2025 Jul–Sep is the rate anchor (post-renovation). AirDNA STR comps are market context only and do not override property ADR/occupancy.

1. Property context

- PMS: unknown export (not Cloudbeds)
- Ownership: Aug 2024 · Renovation Nov 2024–May 2025 · Capacity 25→27 rooms ~Apr 2026
- Client concern: revenue / occ / ADR down after tool-driven pricing that ignored short booking windows
- Weekend definition: Fri–Sat · Thu = Sun on recommended matrix (policy)

2. Summer KPIs (stay-month, not combined)

Year	Month	ADR	Occ %	Revenue	Room-nights	Median lead	RevPAR
2025	July	\$173	95%	\$132,049	764	7	\$170
2025	August	\$173	92%	\$120,516	696	6	\$156
2025	September	\$172	90%	\$116,065	673	12	\$155
2026	July	\$165	73%	\$101,528	616	4	\$121
2026	August	\$143	22%	\$25,700	180	36	\$31
2026	September	\$188	14%	\$21,621	115	72	\$27

Note: Aug/Sep 2026 occupancy and Sep ADR are on-books / incomplete, not final month results.

Read: 2025 summer held ~\$173 ADR at 90–95% occ. 2026 Jul is mildly soft on rate (\$165) and softer on occ (73%). 2026 Aug on-books ADR (~\$143) is the main positioning miss versus a historically late-booking, high-ADR August.

3. Weekday vs weekend (Fri–Sat)

Year	Month	Day group	ADR	Median lead	RN share
2025	July	Weekday	\$168	7d	76%
2025	July	Weekend (Fri–Sat)	\$189	9d	24%
2025	August	Weekday	\$162	6d	65%
2025	August	Weekend (Fri–Sat)	\$197	8d	35%
2025	September	Weekday	\$167	12d	74%
2025	September	Weekend (Fri–Sat)	\$189	10d	26%
2026	July	Weekday	\$161	2d	71%
2026	July	Weekend (Fri–Sat)	\$179	6d	29%
2026	August	Weekday	\$140	37d	81%
2026	August	Weekend (Fri–Sat)	\$153	28d	19%

Year	Month	Day group	ADR	Median lead	RN share
2026	September	Weekday	\$157	69d	61%
2026	September	Weekend (Fri–Sat)	\$237	118d	39%

2025 August weekend premium was ~+28% vs MTW (Fri–Sat ~\$197 vs weekday ~\$162) with median leads of only ~6–8 days. Short booking windows are structural — not a reason to clear rates early.

4. Pace as-of 2026-07-24

Stay year	Month	On-books RN	On-books ADR	vs LY on-books
2025	July	700	\$171	109%
2025	August	249	\$154	88%
2025	September	98	\$178	53%
2026	July	616	\$165	88%
2026	August	180	\$143	72%
2026	September	115	\$188	117%

Aug 2026 is at ~72% of LY on-books RN with soft ADR. Thin pace alone is expected for August; thin pace + soft ADR is the risk.

5. Channel mix (Jul–Sep combined by year)

Year	Channel	Rev share	ADR	Revenue
2025	Expedia	49%	\$161	\$180,214
2025	Booking.com	20%	\$184	\$72,334
2025	Direct	14%	\$190	\$53,173
2025	Walk-In	8%	\$185	\$29,082
2025	Airbnb	6%	\$192	\$20,710
2025	Phone	4%	\$187	\$12,927
2026	Expedia	33%	\$135	\$49,783
2026	Direct	25%	\$185	\$37,014
2026	Booking.com	14%	\$180	\$20,521
2026	Airbnb	12%	\$190	\$18,203
2026	Walk-In	11%	\$170	\$15,848
2026	Phone	5%	\$227	\$7,480

Expedia share fell (~49% → ~33%) while Direct rose (~14% → ~25%). Channel insight is separate from rate-band recommendations.

6. AirDNA market context (secondary)

Filter set: 0–1 BR, 1–2 bath, 1–4 guests, entire/private, economy–upscale. STR comps — not a hotel ADR target.

Year	Month	Mkt occ	Mkt ADR	Prop occ	Prop ADR	Occ gap	ADR gap
2025	July	79%	\$180	95%	\$173	+16.6 ppt	\$-7
2025	August	77%	\$176	92%	\$173	+15.8 ppt	\$-3
2025	September	73%	\$169	90%	\$172	+16.8 ppt	+\$3

2025 property ran ~15–17 ppt above this STR set on occupancy with ADR roughly in line — softness looks more property/pricing than market collapse.

Forward market rates (next ~180 days)

Month	Avg booked listings	Avg ADR	Min	Max
Jul-2026	77	\$180	\$167	\$192
Aug-2026	52	\$175	\$163	\$197
Sep-2026	36	\$175	\$160	\$187
Oct-2026	19	\$154	\$125	\$173
Nov-2026	6	\$147	\$125	\$171
Dec-2026	7	\$166	\$138	\$209

Near-term pickup: ~31% of next-30-day on-books arrived in the last 30 days; only ~42% were booked >60 days out. August market Fri–Sat forward ADR is already ~\$185–197.

7. Recommended rate matrix (Jul–Sep)
